To: homechicken@gmail.com

I got your E-mail address from the old MudDev discussions (2004-2007) where I used to post. I am spamming you because:

1. Does anyone want the source-code for a graphical MUD?

I have suspended work on my www.CircumReality.com graphical-MUD. A 1.5-gigabyte download of the source-code is available for free from the web site. It includes **source-code for text-to-speech**, a multi-core 3D renderer, a 3D editor, a graphical MUD client, and an LPMUD-like server with an IDE. The MUD scripting-code is targeted less-towards combat, and more towards interactive-fiction and NPC-interaction.

2. This will be one of the stranger E-mails you will ever receive...

You most-likely won't believe me, so please read this section tongue-in-cheek. The information may still be useful to you.

Two years ago, I realized that I was being bi-annually abducted by aliens – yes, real aliens. I requested to be flown off of Earth, but failed to get a ride off of Earth due to political, legal, treaty, and war-related reasons. Stuck on Earth, I stopped working on my graphical-MUD, and devoted my time to writing a “disclosure” document.

I am currently employed by Saurians. I also do freelance work for some Greys. As well as some

mammaloids (the inspiration for Earth-based “furrries”).

The aliens want me to pass the following information on to you (game designers):

- **To anyone creating 3D-models of dinosaurs for games** – You haven't the faintest clue what dinosaurs look like. I have attached a photograph of a Saurian (SaurianNotVelociraptorPhoto.jpg) that I found on the internet on a UFO web-site. I illustrated a corrected image with feathers (SaurianNotVelociraptorWithFeathers.png). I have also attached illustrations of a few other Saurians and dinosaurs to this E-mail. Look through my 2500-page document, **“Africa is to 1st world countries on Earth, as Earth is to alien nations”** (<http://www.disclosuree.com/AfricaEarthFullEBook.pdf>), for the keywords **“saurian”**, **“dinosaur”**, **“velociraptor”**, **“tyrannosaur”**, and **“palaeontologist”**. My short stories (<http://www.disclosuree.com/Stories.pdf>) also include some Saurians as characters.
- **To anyone interested in world design** – My 2500-page document is FULL of world-design memes. It's like a memo-version of J.R.R. Tolkien's *Silmarillion*, but less-boring, and without all of the Elven histories. Just browse through **“Africa is to 1st world countries on Earth, as Earth is to alien nations”** for world-design ideas (<http://www.disclosuree.com/AfricaEarthFullEBook.pdf>). Feel free to loot/incorporate/percolate the ideas.

The document includes discussions on: technologies, telepathy (provided by cranially-injected 3G mobile-phones with REM-sleep video – like guild-chat), races, cultures, intelligence, architecture, ways of thinking, cooking recipes, the art of conversation, games, computers, the war, mathematics, the nature of the soul, how Earth fits into the galactic politics, and why “disclosure” hasn't happened here yet, etc.

- **Game design mechanics** – Many of the technologies described in the document can be incorporated into virtual-world games to produce new game mechanics. **“Extradimensional”** (more than 3-dimensional) spaceplanes, **“combat suits”**, and extradimensional medical devices can provide new game-play. Browse through my document, **“Africa is to 1st world countries on Earth, as Earth is to alien nations”** (<http://www.disclosuree.com/AfricaEarthFullEBook.pdf>). Also search for the keywords: **“game”** and **“computer”**. Please check-out two game-design forums where I recently began some alien/UFO game-design threads: <http://forums.indiegamer.com/showthread.php?27835-Alien-UFO-game-design-ideas> and <http://www.gamedev.net/topic/604096-alienufo-game-design-ideas/> .
- **If you're interested in reading some of my lunch-break alien-science-fiction short-stories** – Take a look at (<http://www.disclosuree.com/Stories.pdf>). They are easier to “get into” than jumping directly into the full 2500-page document.

Have fun!
